Office Action Summary	Application No. 10/540,238	Applicant(s) MIKADO ET AL.	
	Examiner Helen C. Kwok	Art Unit 2856	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on August 29, 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 7-12 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 8-14 of U.S. copending Application 10/540,239 (Mikado et al. – U.S. Patent Publication No. 2006/0081048) in view of U.S. copending Application 10/540,240 (Mikado).

Mikado et al. '239 discloses an acceleration sensor claiming all of the features as presently claimed in the instant Application except for claim 12. Mikado '240 discloses an acceleration sensor claiming the features as presently claim in the instant Application along with the lacking feature of claim 12 of the instant Application (this is claimed in claim 14 of the Mikado '240 application).

3. Claims 7-12 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 9-14 of copending Application No. 10/540,240 (Mikado) in view of U.S. copending Application 10/540,239 (Mikado et al. – U.S. Patent Publication No. 2006/0081048).

Mikado et al. '240 discloses an acceleration sensor claiming all of the features as presently claimed in the instant Application except for the feature of "each of the first and second resonators is attached to the base plate such that the opposite main surfaces having the electrodes disposed thereon are substantially perpendicular to the

application direction of acceleration". Mikado '239 discloses an acceleration sensor claiming the features as presently claim in the instant Application along with the lacking feature as mentioned above in claim 8.

This is a provisional obviousness-type double patenting rejection.

Response to Amendment

4. Applicant's arguments filed August 29, 2006 have been fully considered but they are not persuasive.

The terminal disclaimer filed on August 29, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application Number 10/540,239 and Application Number 10/540,240 has been reviewed and is NOT accepted.

The Application Number/Patent being disclaimed has been improperly identified because Application Number 10/540,239 should be referred in the terminal disclaimer filed on August 29, 2006 instead of U.S. Patent Publication No. 2006/0081048 to identify the application being disclaimed. Please provide a proper terminal disclaimer identifying *Application Number 10/540,239* and *Application Number 10/540,240* to over the above double patenting rejections.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

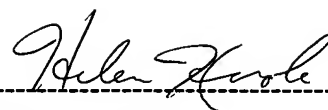

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helen C. Kwok whose telephone number is (571) 272-2197. The examiner can normally be reached on 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron E. Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
